# YOTA 2026

## *Summer Camp*

✦

Austria – Wagrain

25.July – 01.August 2026

# Location

## Wagrain ✦

South of SALZBURG (OE2), in the Austrian Alps at 900m above sea level about 1 hour by bus from the international airport SALZBURG.

[www.alpentravel.com](http://www.alpentravel.com)

Situated in beautiful natural surroundings with wide open fields, this location is just 200 meters from a cable car. It offers spacious seminar rooms for over 90 participants, a large indoor sports hall, and a variety of outdoor facilities including football, beach volleyball, and basketball. Guests stay in modern 2- to 6-bed rooms with shower/WC and TV, and enjoy excellent all-inclusive catering with free non-alcoholic drinks throughout the day. A cozy fireplace area is perfect for evening events and BBQs, while air-conditioned rooms provide ideal conditions for all our technical setups.

# Activities & Excursions

We will be able to experiment with propagation underground using our VHF/UHF radios while exploring the cave labyrinth with a total length of more than 40 kilometres.

Impressive falconry flight displays at the historical falconry centre: Vultures, red kites, falcons and other birds of prey display their airborne grace several times a day. We will make a COTA activation.

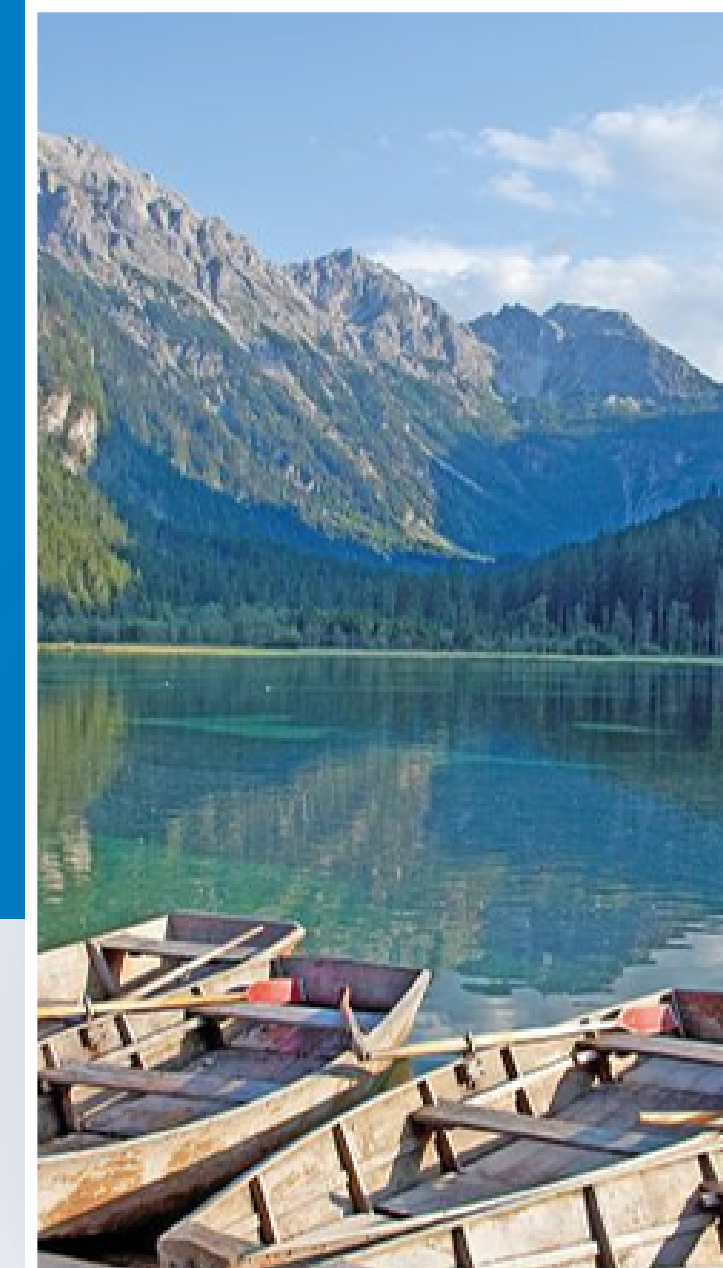

Using the cable car next to the hotel we'll move up to an 1800 to 2000m high summit with beautiful view and mountain top lakes. Perfect to make a long distance VHF/UHF-QSO with your hand-held. We will use our self-made equipment for SOTA contacts!

### Florian Zwingl

After more than a decade, it's finally time to bring this fantastic event back to Austria. You may recognize me from previous events as one of your photographers. Now, I am thrilled to offer you another exceptional chance to visit Austria and participate in this year's camp.

If you require any assistance or have questions, please feel free to reach out to me directly.
